

## Computer Science and Communication Technology

Shingo Takada, Ph. D.

Assistant Professor

Dept. of Information and Computer Science

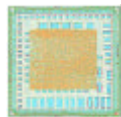

## Why Computer Science and Communication?

- Technology is having an increasing affect on our daily lives.
- **Computers** and **Communication** form the basis of this technology.
- Advances in computers and communication will have a profound affect on our lives.
- This course aims to educate students through lectures and research that results in such advances.

## Research Topics

- **Computer Hardware**
- **Software Engineering**
- **Computer Human Interaction**
- **Database**

## Research Topics

- **Computer Hardware**
- **Software Engineering**
- **Computer Human Interaction**
- **Database**

## Research Topics

- **Software Engineering**
- **Computer Human Interaction**
- **Database**

## Research Topics

- **Computer Hardware**
- **Software Engineering**
- **Computer Human Interaction**
- **Database**

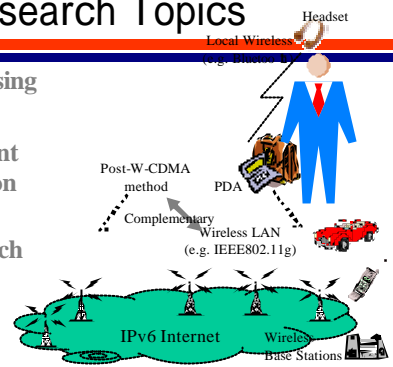

## Research Topics

- Image Processing
- Network
- ITS (Intelligent Transportation System)
- and much much more!!!

## Research Topics

- Image Processing
- Network
- ITS (Intelligent Transportation System)
- and much much more!!!

## Research Topics

- Image Processing
- Network
- ITS (Intelligent Transportation System)
- and much much more!!!

## Research Topics

- Image Processing
- Network
- ITS (Intelligent Transportation System)
- and much much more!!!

## Who Should Apply

- College degrees in:
  - Computer Science
  - Information Science
  - Electrical Engineering
  - and related fields
- Applicants should be self-motivated.

Computer Science  
and  
Communication Technology  
@ Keio University

Creating the basis for the future!
